

**PSYCHOTROPIC MEDICATIONS**

**Schizophrenia**

*Typical antipsychotics:*

Haldol (haloperidol)
Haldol Decanoate Injection
Loxitane (loxapine)
Mellaril (thioridazine)
Moban (molindone)
Navane (thiothixene)
Orap (pimozide)
Prolixin (fluphenazine)
Prolixin Decanoate Injection
Serentil (mesoridazine)
Stelazine (trifluoperazine)
Thorazine (chlorpromazine)
Trilafon (perphenazine)

*Atypical antipsychotics:*

Abilify (aripiprazole)
Clozaril (clozapine)
Geodon (ziprasidone)
Invega (paliperidone)
Risperdal (risperidone)
Risperdal Consta Injection
Seroquel (quetiapine)
Zyprexa (olanzapine)

**Anticonvulsants/Mood Stabilizers**

Carbatrol (Carbamazepine)
Depakene (valproic acid)
Depakote (divalproex sodium)
Dilantin (phenytoin)
Eskalith, Lithobid, Lithonate, Lithotabs (lithium carbonate)
Gabril (tiagabine)
Keppra (levetiracetam)
Lamictal (lamotrigine)
Lyrica (pregabalin)
Neurontin (gabapentin)
Tegretol (carbamazepine)
Trileptal (oxcarbamazepine)
Topamax (topiramate)

**Depression**

*Tricyclics:*

Anafranil (clomipramine)
Asendin (amoxapine)
Elavil (amitriptyline)
Norpramin (desipramine)
Pamelor (nortriptyline)
Sinequan (doxepin)
Surmontil (trimipramine)
Tofranil (imipramine)
Vivactil (protriptyline)

*SSRI's:*

Celexa (citalopram)
Lexapro (escitalopram)
Luvox (fluvoxamine)
Paxil (paroxetine)
Prozac (fluoxetine)
Zoloft (sertraline)

*MAOI's:*

Nardil (phenelzine)
Parnate (tranylcypromine)
EmSam patch (selegiline)

*Others:*

Cymbalta (duloxetine)
Desyrel (trazodone)
Effexor (venlafaxine)
Remeron (mirtazapine)
Serzone (nefazodone)
Wellbutrin (bupropion)

**Anti-Obsessive Agents**

Anafranil (clomipramine)
Celexa (citalopram)
Luvox (fluvoxamine)
Paxil (paroxetine)
Prozac (fluoxetine)
Zoloft (sertraline)

**Anxiety Disorders\***

Ativan (lorazepam)
BuSpar (buspirone)
Klonopin (clonazepam)
Librium (chlordiazepoxide)
Serax (oxazepam)
Tenormin (atenolol)
Tranxene (clorazepate)
Valium (diazepam)
Vistaril (hydroxyzine)
Xanax (alprazolam)

**Panic Disorder\***

Inderal (propranolol)
Klonopin (clonazepam)
Paxil (paroxetine)
Prozac (fluoxetine)
Xanax (alprazolam)
Zoloft (sertraline)
<i>*Antidepressants, especially SSRIs, are also used to treat anxiety and panic.</i>

**CNS Stimulants/ADHD Agents**

Adderall (amphetamine and dextroamphetamine)
Concerta (methylphenidate)
Focalin (dexmethylphenidate)
Dexedrine (dextroamphetamine)
Ritalin (methylphenidate)
Strattera (atomoxetine)
Vyvanse (lisdexamfetamine)

**Miscellaneous CNS Agents**

Antabuse (disulfiram)
Campral (acamprosate)
Chantix (varenicline)
Methadose (methadone)
Narcan (naloxone)
Revia (naltrexone)
Suboxone (buprenorphine/naloxone)
Subutex (buprenorphine)

*Listed above are the brand names, followed by the generic in parentheses of commonly prescribed psychotropic medications. A second chart on the back of this sheet provides cross-referencing by generic name. As with all questions about medication, consult with your physician or pharmacist for any specific questions about dosage, drug interactions, or side effects.*
